

# COST OF PRODUCTION FOR SASKATCHEWAN MEAT GOAT PRODUCERS

*Are you a meat goat producer in Saskatchewan?*

*Do you know what you need to sell your goats for in order to break-even?*

*Do you know the typical production benchmarks for meat goat producers?*

Recruitment is currently underway for Saskatchewan meat goat producers wishing to share their production and financial records in a confidential manner in order to determine their cost of production. While individual data will remain confidential, results will be aggregated and shared as industry benchmarks to advance the meat goat industry in Saskatchewan.

Western Beef's Economist, Kathy Larson, has worked with cow-calf producers across the province to calculate production and financial benchmarks. She has modified the cow-calf cost of production calculator so it is relevant for meat goat producers and she will work with interested goat producers to calculate break-even prices for their operation.

Producers interested in participating in this cost of production survey should contact  
Kathy Larson at [klarson.wbdc@pami.ca](mailto:klarson.wbdc@pami.ca) or call 306.930.9354

**Sign up today! Producers being recruited until June 30, 2017**
